Smart Bluetooth

S19 makes it safer to drive

Light in the box.com

Smart Watch synchronizes phonebook of smartphone

After connecting smartphone via Bluetooth, S19 can synchronize phonebook of the smartphone, so contacts can be consulted on the watch instead of the smartphone and you can keep the smartphone in the pocket

Lightinthebox.com

Smart Watch synchronizes making phone call on smartphone

After connecting smartphone via Bluetooth, S19 can make phone call directly

Smart Watch synchronizes incoming calls of smartphone

When incoming calls, S19 will ring or vibrate and show incoming phone number. You can answer the call from S19 instead of smartphone and it's unnecessary to take out your smartphone, which ensures no missed calls.

接听

Smart Watch synchronizes messages of smartphone

After installing Android app on your smartphone, S19 will notify incoming messages which can be viewed on the watch, and also remind email, Skype / whatsapp message, etc. (Don't work for iOS)

Smart Watch synchronizes Music

When you want to listen to music and it's not convenient to take out the big-screen smartphone, it's no problem, S19 will play the music after connecting the smartphone by Bluetooth and control the music itself.
